► Introduction

The TP1000 series are linear DC power supplies with 2 channels, 95W to 185W output. The TP1000C/1000EC series provide a simpler option of only 1 channel, 90W to 180W output. In constant voltage and current operations, the power supply provides high regulation and low ripple & noise. The output ON/OFF control and coarse/fine control enables safe and easy operation. The TP1000C/1000EC series are widely used in applications of powering operational amplifier, push pull stages, logic circuit and definition systems.
